Index to Communications of the ACM Volume 20, 1977

BIBLIOGRAPHY
AUTHOR INDEX
DEPARTMENT INDEX

Entries in this Index are technical papers, short communications, award papers, educational reports, special papers, and topical articles. Algorithms are indexed separately; the "Index by Subject to Algorithms 1977" is on page 964 of this issue.

The KEY in each entry gives the year and volume number (7720), the issue number (which is also the number of the month), and the beginning page number.

The BIBLIOGRAPHY lists the entries in order of original appearance; each entry gives the title and the name(s) of the author(s).

The AUTHOR INDEX lists the entries in order of alphabetized authors' names. If there is more than one author for a paper, each author is listed separately in alphabetical order; therefore, in this section a single entry would not include co-author's names.

The DEPARTMENT INDEX groups technical papers and short communications according to the technical departments for which they were designated. Other papers are listed last under the heading Reports and Articles.

1977 Index by Subject to Algorithms

Algorithms published elsewhere are included. Each entry gives the key to the classification system categories (A1, B1, . . .); the number of the algorithm if in TOMS (starting with Algorithm 499, March 1976); abreviated title with language designator (A for Algol, F for Fortran, etc.); then month, year, page (in parentheses) in TOMS, *or* if published elsewhere, journal designator, volume, year, page (in parentheses).

A cumulative index to algorithms published in CACM/TOMS from 1960 through 1976 may be consulted in "Collected Algorithms from ACM," which is a looseleaf collection of all the algorithms, each with certifications and remarks, if any, appended. The 1976 index also appears in the December 1976 CACM.
